

## Test Report

Number: SHAH01812728

Applicant: PF CONCEPT INTERNATIONAL COOPERATIEF U.A  
KABELWEG 1  
2371 DX ROELOFARENDSEVEEN  
THE NETHERLANDS  
Attn: Jasmine Gu/Sonia HE

Date: 06 May, 2025

### Sample Description:

One(1) group of submitted sample said to be :

Item Name : Grom 650 ml RCS SGL WALL  
Item No. : 10086901-WH, 10086953-RBL, 10086990-BK  
Vendor : #10159/#14165  
Goods Exported To : Europe  
Country Of Origin : China  
P.O. No. : PO#668770  
Date Sample Received : 21 Apr, 2025  
Testing Period : 21 Apr, 2025 To 30 Apr, 2025

### Tests Conducted:

As requested by the applicant, for details refer to attached page(s).

### Conclusion:

| Tested Sample                        | Standard                                                                                                                                                                                                | Result |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Tested Component of Submitted Sample | European Commission Regulation (EU) No. 10/2011, Amendment No. 2020/1245 and other Amendments and Regulation (EC) No. 1935/2004 on Overall migration                                                    | Pass   |
|                                      | Dutch Commodities Act on Packagings and Consumer Articles Regulation (Warenwetregeling verpakkingen en gebruiksartikelen) Annex A Chapter IV on Overall Migration for Metal Materials                   | Pass   |
|                                      | Resolution ResAP(2004)5 on Overall Migration for Silicones Intended to Come into Contact with Foodstuffs                                                                                                | Pass   |
|                                      | European Resolution CM/Res (2020)9 and the Supplementary Technical Guide on Metals and Alloys Used in Food Contact Materials and Articles( EDQM 2nd Edition, 2024) on Specific Migration of Heavy Metal | Pass   |
|                                      | European Commission Regulation (EU) No. 10/2011, Annex I, Amendment No. 2020/1245 and other Amendments and Regulation (EC) No. 1935/2004 on specific migration of Bisphenol A                           | Pass   |

**Test Report**

Number: SHAH01812728

Tests Conducted

- 1 European Commission Regulation (EU) No. 10/2011 and it's Amendments on Overall Migration Test for Plastic Food Contacting Materials/Articles

As per Commission Regulation (EU) No. 10/2011 and its amendments on plastic materials and articles intended to come into contact with food.

I. Test Condition:

| <u>Test No.</u> | <u>Time and Temperature</u> |
|-----------------|-----------------------------|
| OM3             | 2 hours at 70 °C            |

II. Test Results:

| <u>Tested Component</u>           | <u>Result in mg/dm<sup>2</sup></u> |                           |                           |                           |                           |                           |
|-----------------------------------|------------------------------------|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|
|                                   | 3% (w/v) Acetic Acid               |                           |                           | 50% (v/v) Ethanol         |                           |                           |
|                                   | 1 <sup>st</sup> migration          | 2 <sup>nd</sup> migration | 3 <sup>rd</sup> migration | 1 <sup>st</sup> migration | 2 <sup>nd</sup> migration | 3 <sup>rd</sup> migration |
| (5)                               | <3.0                               | <3.0                      | <3.0                      | <3.0                      | <3.0                      | <3.0                      |
| <u>Limit in mg/dm<sup>2</sup></u> | 10                                 |                           |                           | 10                        |                           |                           |

Requirement:

Result of 3<sup>rd</sup> migration < OML, and

Result of 1<sup>st</sup> migration  $\geq$  2<sup>nd</sup> migration  $\geq$  3<sup>rd</sup> migration after consideration of result uncertainty.

Ratio of food contact surface area to volume of component (5) used to establish the compliance of material or article = 0.3 dm<sup>2</sup>: 650 mL.

Remark:

As per client's request, the above condition and food simulant was used for the test.

Tested Component: See component list in the last section of this report.

**Test Report**

Number: SHAH01812728

Tests Conducted

- 4 European Resolution CM/Res(2020)9 and the Supplementary Technical Guide on Metals and Alloys Used in Food Contact Materials and Articles(EDQM 2nd Edition, 2024) on Specific Migration of Heavy Metal

With reference to EU Resolution CM/Res (2020)9 and the supplementary Technical Guide on metals and alloys used in food contact materials and articles(EDQM 2nd Edition,2024) and JRC guideline 2021, migration test was conducted and heavy metal content were determined by Inductively Coupled Plasma Mass Spectrometer (ICP-MS) with reference to ISO 17294-2: 2016.

I. Test Condition:

Food Simulant: Citric Acid (5 g/L)

Temperature: 40 °C Time: 24 hours

II. Test Result:

**Test Report**

Number: SHAH01812728

Tests Conducted

Ratio of food contact surface area to volume of component (4) used to establish the compliance of material or article = 4.77 dm<sup>2</sup>: 480 mL.

Remark: ^ = Chromium (III) content was derived from migration results of total Chromium.

The submitted component is a repeated use article. The migration test was carried out three times on the same article. The sum of the results of the first and second tests should not exceed seven times the limit (Result 1<sup>st</sup> test + Result 2<sup>nd</sup> test < 7 \* limit) and the Result 3<sup>rd</sup> test shouldn't exceed the limit.

As per client's request, the above condition and food simulant was used for the test.

Tested Component: See component list in the last section of this report.

5 Specific Migration of Bisphenol A for Plastic Food Contacting Materials/Articles

As per Commission Regulation (EU) No. 10/2011 and its amendments (including amendment No. 2018/213 and amendment No. 2020/1245) on plastic materials and articles intended to come into contact with food. And followed by Liquid Chromatography-Mass Spectrometry (LC-MS) analysis.

I. Test Condition:

Food simulant: 3% (w/v) acetic acid

Temperature: 40 °C Time: 24 hours

II. Test Results of Bisphenol A (CAS No. 80-05-7):

| Tested<br>Component | Result in mg/kg           |                           |                           |
|---------------------|---------------------------|---------------------------|---------------------------|

| Limit in mg/kg      | 0.05                      |                           |                           |

Requirement:

Result of 3<sup>rd</sup> migration < SML, and

Result of 1<sup>st</sup> migration ≥ 2<sup>nd</sup> migration ≥ 3<sup>rd</sup> migration after consideration of result uncertainty.

Ratio of food contact surface area to volume of component (5) used to establish the compliance of material or article = 0.3 dm<sup>2</sup>: 650 mL.

Remark: Report limit=0.01mg/kg

ND=Not detected (less than report limit)

As per client's request, the above condition and food stimulant was used for the test.

Tested Component: See component list in the last section of this report.

| Limit in mg/kg   | 0.6                       |                           |                           |

Requirement:

Result of 3<sup>rd</sup> migration < SML, and

Result of 1<sup>st</sup> migration ≥ 2<sup>nd</sup> migration ≥ 3<sup>rd</sup> migration after consideration of result uncertainty.

Ratio of food contact surface area to volume of component (5) used to establish the compliance of material or article = 0.3 dm<sup>2</sup>: 650 mL.

Remark: ND = Not Detected

Detection Limit of DAP=0.01mg/kg

For sum of DBP, DIBP, BBP and DEHP (Expressed as DEHP), below equation was used:

Sum = DBP x 5+ DIBP x 4 + BBP x 0.1 + DEHP x 1

As per client's request, the above condition and food simulant was used for the test.

Tested Component: See component list in the last section of this report.

## Test Report

Number: SHAH01812728

### Tests Conducted

#### Requirement:

Result of 3<sup>rd</sup> migration < SML, and

Result of 1<sup>st</sup> migration  $\geq$  2<sup>nd</sup> migration  $\geq$  3<sup>rd</sup> migration after consideration of result uncertainty.

Result of 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> migration < SML when SML limit is Not Detected (ND)

Ratio of food contact surface area to volume of component (5) used to establish the compliance of material or article = 0.3 dm<sup>2</sup>: 650 mL.

Ratio of food contact surface area to volume of components (6)~(8) used to establish the compliance of material or article = 0.1 dm<sup>2</sup>: 650 mL.

Remark: ND = Not detected (Less than detection limit)

Other primary aromatic amines are p-Phenyldiamine, Aniline, 2,4-Xylidine, 2,6-Xylidine, 3-Methoxyaniline, 2,6-Toluene-diamine, 1,5-Diaminonaphthalene, 4-Ethoxyaniline, 3-Amino-4-methoxybenzanilide, 3-Amino-4-methylbenzamide, 2-Amino-5-methylbenzoic acid

Tested component(s) : See component list in last section of the report.

**Test Report**

Number: SHAH01812728

Tests Conducted

9 Polycyclic Aromatic Hydrocarbons (PAHs) Content

As Per AfPS GS 2019:01 PAK, by solvent extraction and determined by Gas Chromatography – Mass Spectrometer (GC/MS).

(I) Test Results:

| Test Item                                  | CAS No.  | Result (in mg/kg) |
|--------------------------------------------|----------|-------------------|
|                                            |          | (5)               |
| 1. Phenanthrene                            | 85-01-8  | ND                |

Tests Conducted

12 Sensory Evaluation

With reference to DIN 10955.

Test procedure:

Sample was thoroughly rinsed with distilled water and then filled with distilled water to capacity. Filled sample was kept at ambient temperature 40 °C for 24 hours. Off-odor and off-taste was evaluated with 6 panelists using control sample of distilled water.

|            | <u>Result</u>     |                   |                   | <u>Limit</u>      |
|------------|-------------------|-------------------|-------------------|-------------------|
|            | (11)              | (12)              | (13)              |                   |
| Appearance | Clear, Colourless | Clear, Colourless | Clear, Colourless | Clear, Colourless |
| Odor       | 0                 | 0                 | 0                 | 2.5               |
| Taste      | 0                 | 0                 | 0                 | 2.5               |

Assessment:

Intensity scale:

0 = No perceptible odour / taste

1 = Odour / taste just perceptible (but still difficult to define)

2 = Slight odour / taste

3 = Distinct odour / taste

4 = Strong odour / taste

Tested Components: See component list in the last section of this report.

13 Specific Migration of N-nitrosamines and N-nitrosatable Substances

With reference to EU JRC Guideline of testing conditions for kitchenware articles in contact with foodstuffs: plastics, metals, silicon & rubber, (EU) No 10/2011 and its amendments.

I. Test Condition:

| Food Simulant     | Time     | Temperature |
|-------------------|----------|-------------|
| 50% (v/v) Ethanol | 24 hours | 40°C        |

II. Test Result:

|                               | (6)            | (7) | (8) |                            |                               |
| Volatile Organic Matter (VOM) | ND             | ND  | ND  | 0.1                        | 0.5                           |

Remark: ND = Not detected (Less than the reporting limit)

The cut sample was conditioned at 100 °C for 1 hour to remove sorbed water before treatment at 200 °C for 4 hours.

Tested Component(s): See component list in the last section of this report.

15 REACH Regulation (EC) No. 1907/2006 ANNEX XVII Entry 23 on Cadmium (Cd) Content

With reference to methods EN 1122 (Method B)/ IEC 62321-5: 2013/ ISO 11885: 2007, acid digestion method was used and total Cadmium content was determined by Inductively Coupled Argon Plasma Spectrometry.

Tests Conducted

16 Lead (Pb) Content (REACH Regulation (EC) No 1907/2006 Annex XVII Entry 63)

With reference to method IEC 62321-5:2013, microwave digestion method was used and total Lead content was determined by Inductively Coupled Argon Plasma Spectrometry.

| Test Item | Result (%) |     |     |         | Reporting Limit (%) | Limit (%) |
|-----------|------------|-----|-----|---------|---------------------|-----------|
|           | (1+2+3)    | (4) | (5) | (6+7+8) |                     |           |
| Lead (Pb) | ND         | ND  | ND  | ND      | 0.001               | 0.05      |

The limit was quoted according to Commission Regulation (EU) 2015/628 amending the REACH Regulation (EC) No 1907/2006 Annex XVII (Entry 63) for Lead content in articles which may be placed in the mouth by children during normal or reasonably foreseeable conditions of use.

Remark: ND = Not detected (Less than reporting limit)

Tested Components: See component list in the last section of this report.

17 Phthalates Content (In SVHC List)

By solvent extraction and followed by Gas Chromatography – Mass Spectrometry analysis.

| Test Item                                                                                                                                                                                    | CAS No.                   | Result (%) |

**Test Report**

Number: SHAH01812728

Tests Conducted

Remark: Reporting limit=0.010%  
SVHC = Substance of very high concern  
ND = Not detected (the result is less than the reporting limit)  
Reporting limit = Quantitation limit of analyte in sample

Notes:

1. Substances of very high concern (SVHC) are classified as:
  - (a) Carcinogenicity category 1A or 1B;
  - (b) Germ cell mutagenicity category 1A or 1B;
  - (c) Reproductive toxicity category 1A or 1B, adverse effects on sexual function and fertility or on development;
  - (d) Persistent, bioaccumulative and toxic (PBT)
  - (e) Very persistent and very bioaccumulative (vPvB)
  - (f) Other substances for which there is scientific evidence of probable serious effects to human health or the environment which give rise to an equivalent level of concern, such as endocrine disrupters

REACH Requirement:

As per Article 7 of Regulation (EC) No 1907/2006 (REACH) as amended, if a substance of very high concern (SVHC) on the Candidate List for Authorisation is present in articles above a concentration of 0.1% weight by weight (w/w) and the substance is present in those articles in quantities totalling over 1 tonne per producer or per importer per year, then the producer or importer shall notify the European Chemicals Agency (ECHA). The notifications have to be submitted no later than 6 months after the inclusion in the Candidate List. The information to be notified shall include the following:

- (a) Identity and contact details of the producer or importer;
- (b) Registration number(s), if available;
- (c) Identity of the substance;
- (d) Classification of the substance(s);
- (e) Brief description of the use(s) of the substance(s) in the article and of the uses of the article(s);
- (f) Tonnage range of the substance(s).

As per Article 31 of Regulation (EC) No 1907/2006 (REACH) as amended, the supplier of mixture not classified as hazardous according to Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures (CLP), shall provide the recipient at his request with a safety data sheet, where a mixture contains at least one substance on the SVHC list (Candidate List of substances of very high concern for Authorisation) and its individual concentration is of 0.1% or above by weight for non-gaseous mixtures.

As per Article 33(1) of Regulation (EC) No 1907/2006 (REACH) as amended, any supplier of an article containing a substance of very high concern (SVHC) on the Candidate List for Authorisation in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with information of safe use of the article. An article meets the requirement of Article 33(1) by default when no SVHC exceeds 0.1% weight by weight (w/w).

As per Article 33(2) of Regulation (EC) No 1907/2006 (REACH) as amended, any supplier of an article containing a substance of very high concern (SVHC) on the Candidate List for Authorisation in a concentration above 0.1% weight by weight (w/w) shall provide the consumer on request with information of safe use of the article, within 45 days of receipt of the request.

As per Court of Justice of the European Union Judgment in Case C-106/14, Press Release No 100/15 dated 10 September 2015, each of the articles incorporated as a component of a complex product is covered by the relevant duties to notify and provide information when they contain a substance of very high concern in a concentration above 0.1% of their mass.

**Test Report**

Number: SHAH01812728

Tests Conducted

**Waste Framework Directive (WFD) Requirement:**

As per Article 9(1)(i) of Directive 2008/98/EC on waste (WFD, Waste Framework Directive) as amended, Member States shall take measures to ensure that any supplier of an article as defined in point 33 of Article 3 of Regulation (EC) No 1907/2006 (REACH) provides the information pursuant to Article 33(1) of Regulation (EC) No 1907/2006 (REACH) to the European Chemicals Agency (ECHA) as from 5 January 2021. Any supplier of an article containing a substance of very high concern (SVHC) on the Candidate List for Authorisation in a concentration above 0.1% weight by weight (w/w) on the EU market is required to submit a SCIP Notification on that article to ECHA, as from 5 January 2021.

Tested Component(s): See component list in the last section of this report.

18 REACH Regulation (EC) No. 1907/2006 Annex XVII Entry 51 and Entry 52 & Amendments No. 552/2009 & (EU) 2018/2005 on Phthalates Content

With reference to ISO 8124-6: 2023 method A or C, followed by Gas Chromatographic-Mass Spectrometric (GC-MS) analysis (external standard method).

I. Annex XVII Entry 51

| Test Item                      | CAS No.  | Result (%w/w) | Reporting Limit (%w/w) | Limit (%w/w) |

Tests Conducted

19 Tris (2-Chloroethyl) Phosphate (TCEP) Content

By solvent extraction and followed by Liquid Chromatography - Mass Spectrometry analysis.

| Test Item                      | CAS No.  | Result (%) |
|--------------------------------|----------|------------|
|                                |          | (6+7+8)    |
| Tris (2-Chloroethyl) Phosphate | 115-96-8 | ND         |

Remark: Reporting limit=0.010%

SVHC = Substance of very high concern

ND = Not detected (the result is less than the reporting limit)

Reporting limit = Quantitation limit of analyte in sample

Notes:

1. Substances of very high concern (SVHC) are classified as:

(a) Carcinogenicity category 1A or 1B;

(b) Germ cell mutagenicity category 1A or 1B;

(c) Reproductive toxicity category 1A or 1B, adverse effects on sexual function and fertility or on development;

(d) Persistent, bioaccumulative and toxic (PBT)

(e) Very persistent and very bioaccumulative (vPvB)

(f) Other substances for which there is scientific evidence of probable serious effects to human health or the environment which give rise to an equivalent level of concern, such as endocrine disrupters

REACH Requirement:

As per Article 7 of Regulation (EC) No 1907/2006 (REACH) as amended, if a substance of very high concern (SVHC) on the Candidate List for Authorisation is present in articles above a concentration of 0.1% weight by weight (w/w) and the substance is present in those articles in quantities totalling over 1 tonne per producer or per importer per year, then the producer or importer shall notify the European Chemicals Agency (ECHA). The notifications have to be submitted no later than 6 months after the inclusion in the Candidate List. The information to be notified shall include the following:

(a) Identity and contact details of the producer or importer;

(b) Registration number(s), if available;

(c) Identity of the substance;

(d) Classification of the substance(s);

(e) Brief description of the use(s) of the substance(s) in the article and of the uses of the article(s);

(f) Tonnage range of the substance(s).

As per Article 31 of Regulation (EC) No 1907/2006 (REACH) as amended, the supplier of mixture not classified as hazardous according to Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures (CLP), shall provide the recipient at his request with a safety data sheet, where a mixture contains at least one substance on the SVHC list (Candidate List of substances of very high concern for Authorisation) and its individual concentration is of 0.1% or above by weight for non-gaseous mixtures.

As per Article 33(1) of Regulation (EC) No 1907/2006 (REACH) as amended, any supplier of an article containing a substance of very high concern (SVHC) on the Candidate List for Authorisation in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with information of safe use of the article. An article meets the requirement of Article 33(1) by default when no SVHC exceeds 0.1% weight by weight (w/w).

**Test Report**

Number: SHAH01812728

Tests Conducted

As per Article 33(2) of Regulation (EC) No 1907/2006 (REACH) as amended, any supplier of an article containing a substance of very high concern (SVHC) on the Candidate List for Authorisation in a concentration above 0.1% weight by weight (w/w) shall provide the consumer on request with information of safe use of the article, within 45 days of receipt of the request.

As per Court of Justice of the European Union Judgment in Case C-106/14, Press Release No 100/15 dated 10 September 2015, each of the articles incorporated as a component of a complex product is covered by the relevant duties to notify and provide information when they contain a substance of very high concern in a concentration above 0.1% of their mass.

**Waste Framework Directive (WFD) Requirement:**

As per Article 9(1)(i) of Directive 2008/98/EC on waste (WFD, Waste Framework Directive) as amended, Member States shall take measures to ensure that any supplier of an article as defined in point 33 of Article 3 of Regulation (EC) No 1907/2006 (REACH) provides the information pursuant to Article 33(1) of Regulation (EC) No 1907/2006 (REACH) to the European Chemicals Agency (ECHA) as from 5 January 2021. Any supplier of an article containing a substance of very high concern (SVHC) on the Candidate List for Authorisation in a concentration above 0.1% weight by weight (w/w) on the EU market is required to submit a SCIP Notification on that article to ECHA, as from 5 January 2021.

Tested Component(s): See component list in the last section of this report.

20 Octamethylcyclotetrasiloxane (D4), Decamethylcyclopentasiloxane (D5) and Dodecamethylcyclohexasiloxane (D6) Content

By solvent extraction and followed by Gas Chromatography – Mass Spectrometry analysis.

| Test Item                          | CAS No.  | Result (%) |
|------------------------------------|----------|------------|
|                                    |          | (6+7+8)    |
| Octamethylcyclotetrasiloxane (D4)  | 556-67-2 | ND         |

| Cadmium (Cd)          | ND           | ND     | 5                        | --          |
| Mercury (Hg)          | ND           | ND     | 5                        | --          |
| Chromium VI (Cr (VI)) | ND           | ND     | 5                        | --          |
| Total                 | (0-20)       | (0-20) | --                       | 100         |

Remark: ND= Not detected (Less than detection limit)

ppm = parts per million = mg/kg

Tested Components: See component list in the last section of this report.

To be continued

**Test Report**

Number: SHAH01812728

Tests Conducted

Picture of sample

**Components List:**

- 1 White coating on metal. (design on body)
- 2 Pearlescent blue coating on metal. (design on body)
- 3 Pearlescent black coating on metal. (design on body)
- 4 Silver color metal. (inner body)
- 5 Transparent plastic. (lid)-PS
- 6 White soft plastic. (gasket)-Silicone
- 7 Blue soft plastic. (gasket)-Silicone
- 8 Black soft plastic. (gasket)-Silicone
- 9 White paper with black printing. (instruction page)
- 10 Transparent plastic with black coating. (bag)
- 11 Whole sample(White style)
- 12 Whole sample(Blue style)
- 13 Whole sample(Black style)

End of report

*The statements of conformity reported have considered the decision rule agreed, namely that Intertek have taken account of measurement uncertainty as calculated by Intertek, and applied according to ILAC-G8/09:2019 (Non-binary acceptance based on guard band  $w = U$ ) except designation from the customer, regulation or test specification. This decision rule only applies to the numeric test results.*

*The sample(s) and sample information hereto are provided by the client who shall be solely responsible for the authenticity and integrity thereof. The results shown in this report relate only to the sample(s) received and tested. It is not intended to be a recommendation for any particular course of action. Intertek does not accept a duty of care or any other responsibility to any person other than the Client in respect of this report and only accepts liability to the Client insofar as is expressly contained in the terms and conditions governing Intertek's provision of services to you. Intertek makes no warranties or representations either express or implied with respect to this report save as provided for in those terms and conditions. We have aimed to conduct the review on a diligent and careful basis and we do not accept any liability to you for any loss arising out of or in connection with this report, in contract, tort, by statute or otherwise, except in the event of our gross negligence or wilful misconduct.
